

I am writing to support the K-LOVE radio station, FM 91.1 in this area. There are only a few radio stations with possitive, encouraging, and ethical programming which we and our kids can listen to. Since our part of the country is quite hilly, signals from weaker transmitters don't work well in cars and it would be exceedingly difficult to find a station which we feel is suitable for our family's listening. We live in a community where many people listen to K-LOVE while driving from here to there, and back, and a lower powered transmitter would not work well. We appreciate your efforts to solicit public opinion and feedback on this issue. Please help us to keep one of our favorite radio stations on the air.

Thanks!
